www.trm.dk**Conference on the costs of rail**

On 4 and 5 November the Danish Ministry of Transport, in collaboration with the European Commission, the European Union Agency for Railways, EU-Rail and the Danish Civil Aviation and Railway Authority will host a conference on the costs of rail.

Denmark has the presidency of the EU and therefore the presidency is hosting a conference on the costs of rail. The conference is titled “Cutting Costs in Rail” and will assemble high-level participants from the railway sector, EU Member States’ ministries of transport and relevant agencies and the relevant EU institutions.

The goal is to discuss the reasons and possible solutions for the high costs associated with establishing, maintaining and running railway services in Europe today.

The conference is not open to the public to give participants the possibility to discuss options and challenges in confidentiality. The conference is held on 4 and 5 November in Copenhagen.
